

In this new system you will now need to be able to link a particular commodity to an HS Code in the system (see tutorial for reference). To prepare stakeholders like yourself for the change we have created an HS Code Schedule (below) with all the commodities requiring permits. To know what each HS code represents we encourage you to use the HS Code look up tool using the link below:

<https://www.bahamascustoms.gov.bs/tariffs-and-various-taxes-collected-by-customs/tariff-search/>

and you can also see the descriptions associated with each HS Code by searching for it in the Tariff Code Manual found here <https://www.bahamascustoms.gov.bs/wp-content/uploads/2023/06/2023-Tariff-Schedule.pdf>
